DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-4 and 6 are rejected under 35 U.S.C. 102(b) as being anticipated by Tuch et al: High angular resolution diffusion imaging reveals intra-voxel white matter fiber heterogeneity; Magnetic Resonance in Medicine, Vol 48, no 4, October 2002.
3. As regards to claims 1 and 6, Tuch et al teach a magnetic resonance imaging method and system, wherein steps for acquisition of magnetic resonance signals are taken, including application of diffusion weighting, and involving a plurality of diffusion weighting strengths and a plurality of diffusion directions are considered to reconstruct magnetic resonance signals from an object dataset by dataset being assigned apparent diffusion coefficients to voxels in a multidimensional geometric space, and the occurrence of a single or several diffusion directions in individual voxels of the object dataset are identified (figure 1, 3, 4 and 6; page 577, column 1, paragraph 2-3; page 578, column 1-2; page 579, column 1-2).
4. As regards to claims 2-4, Tuch et al further teach multidimensional geometric space and decomposition of apparent diffusion coefficients for individual voxels is achieved on the basis of equal diffusion strengths for principal diffusion directions of a

voxel ((figure 1, 3, 4 and 6; page 577, column 1, paragraph 2-3; page 578, column 1-2; page 579, column 1-2).

5. Claim 5 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Brij B. Shrivastav whose telephone number is 571-272-2250. The examiner can normally be reached on 7 AM to 4 PM.
